---

Raymond, sorry for the late response -just got back in the office. Plan to do a final site walk sometime in the next couple of weeks. I haven't touched base with Bachman as yet so not sure where they are in the tank cleaning process. I am assuming the city is good with the work Bachman did on the creek banks? Hope all is well. Thanks.

**Subject:** Final Inspection of creek area

The creek banks have been re-established and sod installed along areas next to the creek to prevent sediment from entering the creek. There are still about 75 empty tanks on site that are being cleaned before removing. At this time the City of Oklahoma City will not be inspecting the site unless called upon.
